Table of contents

Run a Opus 5.5 deep review of all the notes in this folder. DO NOT MAKE CHANGES TO ANY FILES. Just flag errors, omissions and possible improvements in THE NOTES. Check for inconsistencies. Check references. See if anything is not explained in adequate detail.

We want the notes to be understood by students easily. We can add more figures to explain things better. We want to bend backwards to explain any concept in multiple ways to help students get a full grasp over it.

Write a study plan document that lists the order in which students should read the notes.

Let me know if there are any gaps in the exposition. We are interested in making these notes the mecca of all orbital mechanics students.

The goal is not to make them exhaustive. For that we have Battin. The goal is also not be completely rigorous. But we should definitely make it as easy as possible for the students. We should be able to take them through all the topics without them being overwhelmed.
